Sir:

COMMENTS ON EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

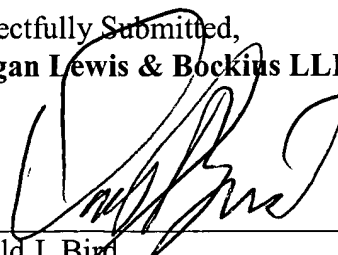

Applicants wish to provide the following supplement to the Examiner's Statement of Reasons for Allowance accompanying the Notice of Allowability in this application.

The Examiner cites U.S. Patent 6,204,267 as teaching two compounds of substituted quinazoline-urea-phenyl but notes that these compounds have been excluded from the instant claims, which are therefore patentable thereover. Applicants have noted that there are actually three such quinazoline-urea-phenyl compound disclosed in the '267 patent, being compounds A-32, A-33 and A-34. However, the structure of compound A-32 appears to have been presented erroneously in the Table in column 30 of the '267 patent, but compound A-32 is named in column 33, lines 41-42 as being a substituted quinazoline-urea-phenyl. This inconsistency may have caused the Examiner to omit reference to this third compound when

commenting on the "two" quinazoline-urea-phenyl compounds disclosed in this patent.

Compound A-32 is also excluded from the scope of the allowed claims, and therefore the present claims should be patentable over all *three* quinazoline-urea-phenyl compounds disclosed in the '267 patent, for the reasons noted in the Examiner's Comments.

Respectfully Submitted,
Morgan Lewis & Bockius LLP
